mat.univie** - the present manuscript was written for my course functional analysis given at the university of vienna in winter 2004 and 2009. it was adapted and extended for a course real analysis given in summer 2011, 2013, and 2018. the last part are the notes for my course nonlinear functional analysis **an introduction to functional analysis - sv.20file** - texts on functional analysis such as [tl], [rul], [cl], etc., although some of the topics covered in the applications such as the nikodym boundedness and convergence theorems, the pettis and bochner integrals, summability and the orlicz-pettis theorem are often not treated in introductory texts. **functional analysis master - rhodes university** - functional analysis is the branch of mathematics, specifically of analysis, concerned with the study of vector spaces and operators acting on them. it is essentially where linear algebra meets analysis. that is, an important part of functional analysis is the study of vector spaces endowed with topological structure. **functional analysis and operator algebras: an introduction** - the current set of notes is an activity-oriented companion to the study of linear functional analysis and operator algebras. it is intended as a pedagogical companion for the beginner, an introduction to some of the main ideas in this area of analysis, a compendium of problems i think are useful in **introduction to functional analysis - peoplerginia** - this is the accompanying expository notes for an introductory course in functional analysis that i was teaching at uva. the goal of the course is to study the basic principles of linear analysis, including the spectral theory of compact and self-adjoint operators. this is not a monograph or a treatise and of course no originality is claimed. **an introductory course in functional analysis** - well-balanced introduction to functional analysis, constantly motivated by applications which make clear not only how but why the field developed. it will therefore be a perfect base for teaching a one-semester (or two) graduate course in functional analysis. a cascade falling from so high is a powerful force, and a beautiful sight.
